

# CENTURION TOWER 110V

1000VA | 2000VA | 3000VA

The Centurion is a True Online Double Conversion UPS designed to provide comprehensive power protection for critical equipment. Versatile software management and hardware options offer the flexibility to build up a power protection solution to fit any application.

Meticulously developed by PowerShield engineers to be a world leading technology UPS, the Centurion Tower addresses absolutely all requirements and features as has been demanded by the sophisticated Australian power consumer and hence stands in a class of its own, as a world leading UPS technology.

## FEATURES

### EXCEPTIONAL SURGE PROTECTION

Offering the best protection in its class to protect against damaging surges.

### OUTPUT POWER FACTOR

The Centurion Tower is a high-density UPS with output power factor (PF=0.9) to provide higher performance and efficiency to critical applications.

### INFORMATIVE LCD DISPLAY

The front panel LCD display panel is readily viewable and displays all critical and noncritical parameters, including the estimated battery backup time remaining.

### PROGRAMMABLE OUTLETS

This UPS comes with programmable power management outlets allowing the user to control the load segments, thereby extending battery backup times to mission critical devices by shutting down non-critical items.

### EMERGENCY POWER OFF FUNCTION (EPO)

This feature can turn off and isolate the UPS in the event of fires or other emergencies.

### ADVANCED ECO MODE

It has an advanced ECO mode, which allows the UPS to operate at a very high efficiency, up to 98%. When the utility mains input voltage is within the ECO range the UPS saves energy by passing the mains supply directly through to the load, while the inverter continues to operate in a passive mode.

### HID COMMUNICATION VIA USB

HID can be used for simple management with Windows, Apple, Linux and NAS devices and a large variety of industrial controllers that support HID.

HID ensures a safe and orderly shutdown in the event of a prolonged power outage.

### NETGUARD SOFTWARE COMMUNICATION VIA USB

The free, downloadable NetGuard software provides complete power monitoring. Parameters such as input/output voltage, battery capacity and load level are easily viewed. It also ensures a safe and orderly shutdown in the event of a prolonged outage.

### BATTERY BANK EXTENSION OPTIONS

The Centurion Tower provides the option to increase battery backup time by simply adding additional battery banks.

To address the need for fast charging of multiple battery banks, PowerShield engineers have incorporated additional independent internal chargers into the PSCEBB18CH and PSCEBB60CH.

### OPTIONAL ACCESSORIES

- PSSHMPV4 – SNMP card (option to connect a PSEMD)
- PSEMD – Environmental Monitoring Device
- PSModbus – Modbus card
- PSAS400 – AS400 dry contact card
- N+X parallel redundancy available for 6K/10K models
- Battery Banks – Backup time for all models is easily extended by simply plugging additional battery banks PSCEBB6, PSCEBB12, PSCEBB18CH, PSCEBB40, PSCEBB60CH
- External Maintenance Bypass Switches – PSMB52k, PSMB53k, PSMB5WPB6k, PSMB5WPB10k

Product specifications are subject to change without further notice. Derate capacity to 80% of capacity in frequency converter mode and to 80% when the output voltage is adjusted. For 100/110/115/120/127VAC system, the output power ratings are different based on different input voltage.
