

Rack Mount MBS & Optional PDU

For PowerShield UPSs 6-10kVA

Three modes of operation: UPS, Bypass and Bypass & Isolate

Features:

- Mechanical safety microswitch with static bypass activation is standard. This eliminates the possibility of incorrect switching sequences and hence possible damage to the UPS and injury to personnel
- Optional PDU available to connect 10A/15A devices through IEC distribution outlet sockets

PSPDU10K (Optional PDU)
