RACK STUDS™

The smart rack mounting system

A revolutionary replacement for cage nuts which are used to mount IT, PRO A/V, Security, and Telecommunications equipment in 19" racks. **Rackstuds**™ make it much easier to mount your gear because they go from the front and provide you with a place to support your equipment while you spin on the lock nut. This makes inserting and removing **Rackstuds** ™ much quicker and assists with mounting even heavy equipment as it no longer needs to be balanced in one hand!

Rackstuds ™ are much simpler, faster, safer and very strong.
